

## LKPD (Lembar Kerja Peserta Didik)

PROGRAM KEAHLIAN	TEKNIK JARINGAN KOMPUTER & TELEKOMUNIKASI
MATA PELAJARAN	ASJ
DOMAIN	Konfigurasi Proxy Server

KELAS	XI -TKJ 1
NO PRESENSI & NAMA	15. Intan Dwi Anggreini

## **URAIAN**

## **Konfigurasi Proxy Server:**

1) Kemudian install ntp dengan mengetikkan perintah **apt-get install ntp**. Jika ada pertanyaan "y/n" ketik "y" kemudian klik enter.

```
root@smkn1kediri:/# apt install ntp
Reading package lists... Done
Building dependency tree
Reading state information... Done
The following additional packages will be installed:
    libevent-core-2.1-6 libevent-pthreads-2.1-6 libopts25 sntp
Suggested packages:
    ntp-doc
The following NEW packages will be installed:
    libevent-core-2.1-6 libevent-pthreads-2.1-6 libopts25 ntp sntp
O upgraded, 5 newly installed, O to remove and O not upgraded.
Need to get O B/1,174 kB of archives.
After this operation, 2,898 kB of additional disk space will be used.
Do you want to continue? [Y/n] y_
```

Setelah selesai menginstal samba, lakukan pengecakan instalasi dengan mengetik kembali **apt-get install ntp**. Instalasi samba sudah berhasil jika muncul tulisan **0 upgrade**, **0 newly installed**, **0 to remove and 0 not upgrade**.

- 2) Lakukan konfigurasi pada file "ntp.conf" yang terletak pada direktori /etc:
  - a) Beri tanda pagar "#" pada line:
    - pool 0.debian.pool.ntp.org iburst
    - pool 1.debian.pool.ntp.org iburst
    - pool 2.debian.pool.ntp.org iburst
    - pool 3.debian.pool.ntp.org iburst

```
# You do need to talk to an NTP server or two (or three).
#server ntp.your-provider.example

# pool.ntp.org maps to about 1000 low-stratum NTP servers. Your server will

# pick a different set every time it starts up. Please consider joining the

# pool: <a href="http://www.pool.ntp.org/join.html">http://www.pool.ntp.org/join.html</a>

#pool 0.debian.pool.ntp.org iburst

#pool 2.debian.pool.ntp.org iburst

#gool 3.debian.pool.ntp.org iburst
```

- b) Dibawah keempat line yg dicommand (diberi tanda pagar) diatas tambahkan line berikut ini:
  - server 127.127.1.0
  - fudge 127.127.1.0 stratum 1

```
# You do need to talk to an NTP server or two (or three).
#server ntp.your-provider.example
# pool.ntp.org maps to about 1000 low-stratum NTP servers. Your server will
# pick a different set every time it starts up. Please consider joining the
# pool: khttp://www.pool.ntp.org/join.html>
#pool 0.debian.pool.ntp.org iburst
#pool 1.debian.pool.ntp.org iburst
#pool 2.debian.pool.ntp.org iburst
#pool 3.debian.pool.ntp.org iburst
#pool 3.debian.pool.ntp.org iburst
#pool 3.debian.pool.ntp.org iburst
#pool 2.7.127.1.0
fudge 127.127.1.0 stratum 1_
```

c) Edit line "restrict 192.168.123.0 mask 255.255.255.0 notrust" menjadi "restrict 10.10.15.1 (alamat ip server) mask 255.255.255.0 (netmask server) notrap nomodify".

```
# Needed for adding pool entries
restrict source notrap nomodify noquery
# Clients from this (example!) subnet have unlimited access, but only if
# cryptographically authenticated.
restrict 10.10.15.0 mask 255.255.255.0 notrap nomodify
```

- d) Setelah konfigurasi pada file /etc/ntp.conf selesai simpan perubahan file. (CTRL + O)
- 3) Kemudian restart ntp

```
root@smkn1kediri:/# /etc/init.d/ntp restart
[ ok ] Restarting ntp (via systemctl): ntp.service.
root@smkn1kediri:/# _
```

- 4) Lakukan pengecekan waktu pada server dan client:
  - Waktu pada PC Server

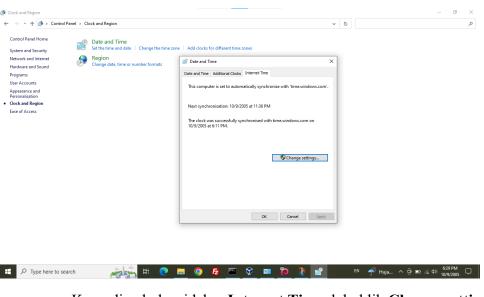

```
root@smkn1kediri:/# date
Mon 16 Jan 2023 06:30:38 PM WIB
root@smkn1kediri:/# _
```

Waktu pada PC Client

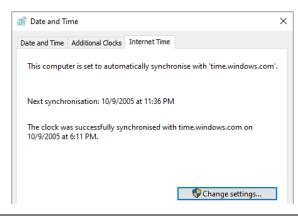

Dari pengecekan diatas disimpulkan waktu antara server dan client masih belum sinkron.

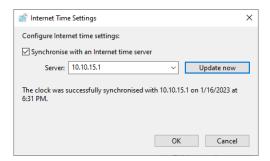

- **5)** Berikut langkah-langkah sinkronisasi waktu pada pc client dengan pc server:
  - Buka Control Panel > Clock and Region > Date and Time.

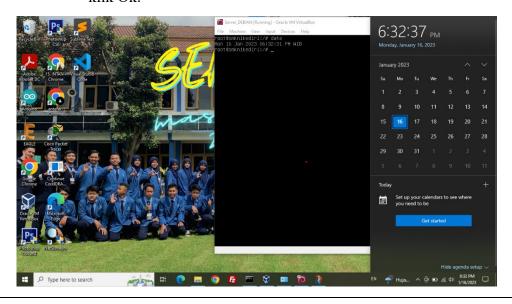

• Kemudian buka sidebar Internet Time, lalu klik Change settings.

• Pada bar server masukkan 10.10.15.1 (alamat ip server) lalu klik update now.

• Ketika muncul text "The clock successfulpt synchronized with 10.10.15.1 (alamat ip server) on (tanggal server) (waktu server), maka sinkronisasi waktu client dengan server telah berhasil lalu klik Ok.

**KESAN** 

Semoga ilmu yang saya peroleh dari praktek ini dapat menjadi ilmu yang bermanfaat dan barokah untuk saya kedepannya.
